### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

Claims 1-66 are pending.

#### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-15, drawn to a method of screening for modulators by determining the formation of free polyubiquitin chains, classified in class 435, subclass 7.1.
- II. Claims 16-29, drawn to a method of screening for modulators by determining the polyubiquitination of TRAF, classified in class 435, subclass 7.1.
- III. Claims 30-41, drawn to a method of screening for modulators by determining the ubiquitin ligase activity of TRAF, classified in class 435, subclass 15.
- IV. Claims 42-53, drawn to a method of screening for modulators by determining the kinase activity of TAK, classified in class 435, subclass 15.
- V. Claims 54-66, drawn to a method of screening for modulators by determining the phosphorylation state of I $\kappa$ B and MKK, classified in class 435, subclass 7.1.

Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). Also, product and process inventions are distinct if any of the following can be shown: (1) that the process as

Art Unit: 1652

claimed can be used to make another and materially different product, (2) that the product claimed can be used in a materially different process of using that product, or (3) that the product claimed can be made by another and materially different process (MPEP § 806.05(h)). These inventions are different or distinct for the following reasons.

Inventions I-V are independent because the methods of Inventions I-V comprise different steps, utilize different products and/or produce different results. Because the methods of Inventions I-V comprise different steps, utilize different products and/or produce different results, the search for any one invention would not encompass the search for any other invention and searching all of Inventions I-V, or any combination thereof would be a burden on the Office.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art due to their recognized divergent subject matter, as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
